## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. Claims 13-17 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 5.
2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-3, 5, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Gortnar et al. (USPN 3,656,570).

Gortnar shows a hydraulically driven four wheel drive vehicle having a hydraulic motor 20-24 for each wheel. A pump 3, 4, 5, feeds oil to the motors. Loss of traction at

Art Unit: 3611

one or more wheels is detected and causes a reduction in flow to the motor at that wheel.

4. Claims 1-3, 5, and 20 are rejected under 35 U.S.C. 102(a and e) as being anticipated by Rodgers et al. (USPN 6,408,972).

Rodgers shows a traction controlled four wheel drive vehicle, A motor 14-20 is provided at each wheel 32-38 loss of traction at each wheel is sensed 40-46 and output of the motors is controlled in response to detected slip.

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 18 and 19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gortnar '972 in view of Puett (USPN 6119802).

Gortnar lacks a teaching of an accumulator that receives output from a motor on a slipping wheel.

Puett teaches diverting motor output to an accumulator when it is not required.

It would have been obvious to one of ordinary skill in the art to provide the Gortnar vehicle with an accumulator that receives motor output when it is not required to drive the wheels, in order to assist the pump for smooth acceleration of the vehicle.

7. Claims 4 and 6-12 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3611

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Pollman, Prohaska, Kaspar, and Gray show hydraulically driven four wheel drive vehicles.
